

This project uses the template: http://themeforest.net/item/book-your-travel-online-booking-wordpress-theme/full_screen_preview/5632266

As you can see the template is currently tweaked to the customers demand. But it needs more tweaks starting with:

<http://hit.wd-media.nl/nl/accomodaties/house-adrienne>

This page needs to have the same divisions as :

<http://www.wimdu.nl/offers/1W889RU4> as you can see there is quite some work finished for this.

What has to be done:

- Calender should scroll like now but on the same side as Wimdu and no transparency background
- Calender should be in Sync with calendar in booking form at almost the bottom of the page
- Booking form should be opened in a popup / lightbox. (There is already a functionality for this here, originally its loaded in a popup)
- The ID should be visible in back and Frontend for like a reference number
- Then their should be a custom option build in to add some prices per person like: Cancellation insurance 7% of the price of the home + 3,50 costs & Travel insurance 2 euro per day, per person. (These amounts must be changeable per accommodation and calculated in the price)
- Then al the content on the left need to be set in a div class to only have $\frac{3}{4}$ off the width so the scrolling calendar has $\frac{1}{4}$ off the width
- Info placed like this:

Private Suite/2bd/Bath, 3min to DT!!

Nashville, TN, Verenigde Staten ★★★★★ (85)

- Customers need to be allowed to register and login (this function is already there only not yet activated)
- Their details if logged in should be already filled in the booking form if filled.

Now The search page: <http://hit.wd-media.nl/nl/zoeken>

This needs to be styled as well:

- Left side Google map. (Map will not scroll only the left side. I have some script already running for this to calculate the fixed position)
- Locations provided in the results need to be in the Google Map too
- Extra search filter for facilities so you can pick the accommodation and search result by the facilities where wished for.
