## About clan Groen

### The game

Clan Groen is a tactical ops gaming clan.

Tactical Ops: Assault on Terror is an online multiplayer computer game with similar gameplay to Counter-Strike. Though it started as a mod for Unreal Tournament in December 1999, it soon became available as a retail version, which was released in April 2002 in the United States. The retail version is a standalone which does not require Unreal Tournament and contains additional maps not found in the free download.

### History

Clan Groen was created on clanbase at 30-11-2005 and was ment to be a 2on2 clan for father and son. Soon they discovered that it was more fun to play with more people, so they invited some friends to join the clan. Clan Groen was born to be a funclan that would last for years.

The clan Groen was to be a funclan they got some skilled members that wanted more then just to plat for fun. So they joined some clanbase ladders and play to win aswel. **On 20 december 2007 clan groen won the 2<sup>nd</sup> league of the “clanbase opencup fall 2007” competition.**

Clan groen is well known by almost all of the Tactical ops community since its one of the oldest and most active clans in the scene. Also, over the last 4 years clan Groen has played over **800 official clanbase matches**. That's a average of 0.5 matches **every day** for the last 4 years!
